

Case Study

Bolton at Home

Bolton at Home is committed to investigating and resolving cases of Anti-Social Behaviour which cause distress to residents living on Bolton at Home Estates. Bolton at Home uses WCCTV equipment where appropriate, in order to gather evidence, prove breaches of the tenancy agreement and support any court applications which may include possession of the property. Bolton at Home also provides support to victims of Anti-Social Behaviour.

■ The Challenge:

A resident living in sheltered accommodation was repeatedly allowing youths to enter the property. These youths were causing problems and distress towards other residents, leaving them intimidated. The same youths also caused damage to the sheltered accommodation's communal area.

Bolton at Home's main objective was to gather enough evidence to support an application for possession, and to bring peace and quiet back into the immediate community.

■ The Solution:

An **overt lamp post Dome camera** was fixed outside of the residential area and a **covert camera** was placed at a resident's property looking at the communal area.

With the help of residents providing dates and times of incidents, Bolton at Home staff cross-referenced images collected from each camera and provided evidence to the police and courts.

The **WCCTV 3G Dome** on the lamp post provides the user with complete flexibility and portability. The system can be deployed in any location and is ideal for rapid installation and temporary surveillance applications.

The **WCCTV 3G Compact** is a discreet unit which can be set up easily in any environment for remote surveillance purposes. The unit has an integrated Hard Disk for digital recording, giving users the option to view either live images or recorded footage from any remote location.

Case Study

Bolton at Home

Wireless CCTV's 3G Domes were deployed just outside of the targeted residential area, while a WCCTV 3G Compact covert surveillance device was placed at a resident's property monitoring the communal area.

The **WCCTV 3G Dome** provides the user with complete flexibility and portability. The system can be deployed in any location and is ideal for rapid installation and temporary surveillance applications.

The Dome system has an integrated camera and wireless **high-speed 3G transmission** unit offered as a 'one box' solution. Users can dial in remotely in order to access live and recorded digital evidential quality footage from the **internal hard drive**. The camera itself can be controlled remotely with **full pan, tilt and zoom** functionality and has 360 degree field

The **WCCTV 3G Compact** is a discreet unit that can be utilised for any remote surveillance purpose. The unit has an **integrated hard disk** for digital recording, giving users the option to view either live images or recorded footage from any remote location. The Wireless 3G Compact has **four camera inputs**.

■ The Results:

Bolton at Home's ASB Team combined evidence from residents and images downloaded from WCCTV equipment to support its application for possession of the property.

Data is shared within Bolton's BSAFE partnership. This is used to produce ASB and Crime statistics for the Borough of Bolton at monthly partnership and local partnership meetings.

"WCCTV equipment is a vital tool to deter crime and disorder, and bring back peace and quiet to communities who have suffered from ASB".

Masood Master, ASB Team, Bolton at Home

■ Main Features and Benefits of WCCTV equipment:

- Compact 'all in one' solutions
- Remote control with full pan, tilt and zoom
- Remote access to live and recorded digital footage
- Rapid 'plug and play' installation
- Multiple transmission options including 3G (HSUPA), Wi-Fi and broadband.
- Ability to redeploy the system quickly
- Free unrestricted Single View Software
