

WCCTV Body Worn Camera (Connect)

The WCCTV Body Worn Camera (Connect) is an award-winning UK manufactured body worn camera offering live video transmission, audio, real-time alerts and GPS information via 4G/3G and Wi-Fi connectivity.

The transmission element enables a remote connection to a body worn camera in the field, allowing an operator to view live video, communicate with the wearer and understand their position via GPS.

Alternatively, the wearer of the device can send an alert back to a control room, monitoring station or command centre with their live video, GPS location details and a request for assistance.

The WCCTV Body Worn Camera (Connect) is a single unit, with no external cables, battery packs, transmission units or tethering.

It's simple, functional design lends itself to ease of use, with one button to start recording and one button to stop recording.

Why Connect?

The demand for body worn camera technology has been driven by the need to protect the wearer and the public by having greater transparency over how incidents occur and have been dealt with.

This is purely retrospective - there is no opportunity for real-time intervention, advice or assistance for a wearer out in the field who is left to rely on his or her own best judgement until a review can take place.

WCCTV's Body Camera (Connect) drastically improves security, safety and decision making for agents in the field, and allows supervisors to coordinate tactical operations in real-time with eyes on the ground.

Complete Body Worn Video Solutions

WCCTV's Body Worn Cameras can be provided as part of a complete body worn video solution when used in conjunction with WCCTV's Evidence Management Software (EMS).

WCCTV's Evidence Management Software (EMS) provides secure management of videos and images taken from your WCCTV Body Worn Cameras.

WCCTV EMS provides full encryption, ensuring your files are completely secure, and a detailed audit trail to protect the evidential integrity of the videos you capture.

A wide range of accessories to support the deployment of the Body Worn Camera (Connect) are available.

Features & Benefits

- UK Manufactured
- Complete situational awareness
- Real-Time Video, Audio and Alerts
- Two-Way Audio
- 4G, 3G and Wi-Fi with automatic fall-back ensures unrestricted coverage
- Tiered data packages for optimal flexibility
- One-Box system - no wires, cables or external batteries
- 125° horizontal x 78° vertical field of view
- Up to 1080p playback at up to 30fps

Possible Applications

- Law enforcement applications
- Security applications
- Enforcement officer protection
- Command and control situations
- Situational awareness
- Health and safety applications
- Project overview

Specifications

General	Dimensions (HxWxD)	115mm x 65mm x 25mm
	Operating Temperature Range	-20 to +55°C
	Power	Li-Polymer battery
	Weight	200g
	Playback Resolution	Up to 1080p
	Operation	Record and playback
	Metadata	Date, time and GPS
Video	Maximum FPS	30
	Recording	H.264
	Snapshot Video Clip	Yes
	Encryption	128 AES video encryption
	Pre-event Recording	30 seconds, 60 second, 90 second or 120 second pre-event recording buffer
	Archive Protection	Yes - protect against overwriting
Storage	Internal Capacity	16GB, 32GB, 64GB, 128GB
	Storage Device	microSD Card
	Export	USB Interface / Removable SD Card
Operation	Battery Time (Recording)	6.5 hours, full HD resolution, 25fps
	Battery Time (Standby)	15 hours
	Display Screen	2.8 inch TFT colour display with QVGA resolution (320 pixels height and 240 pixels width)
	Light	LED white-light 5m illumination for day/night recording
	Charging	Standard USB charging with 500mA on a USB Host (PC, external powered USB hub) Fast USB charging with a 2A on an USB Charger WCCTV Smart Hub charging options available
	Network	LTE, 4G, 3G, GPRS, Wi-Fi 802.11n
	Warranty	12 months warranty with options for extended warranty
