

USE CASES IN CONSTRUCTION

WCCTV'S VERSATILE **MOBILE VIDEO SURVEILLANCE UNITS** DELIVER MULTI-APPLICATION BENEFITS FOR THE CONSTRUCTION INDUSTRY.

Below, we highlight some of their primary use cases, and how they support one of the most challenging work environments.

ENHANCED JOB SITE SECURITY

01

WCCTV mobile surveillance units offer 24/7 protection for your job sites. Users can access them remotely via WCCTV's licence-free software, allowing construction project managers to instantaneously receive live alerts of any intrusion onto the site via their cellphone or laptop.

02

MATERIAL THEFT PREVENTION

Every theft from a job site has multiple ramifications - the cost to replace items stolen, potential project delays, and increasing insurance premiums across the industry.

WCCTV's mobile surveillance units are highly-visible, protective theft prevention solutions specifically designed to deter, catch, and record thefts from your sites. .

REMOTE PROJECT MANAGEMENT

03

It's likely your business will have multiple projects running simultaneously, and a construction project manager may have responsibility for two or more sites. The live access capability of WCCTV's units helps reduce the number of physical site visits required to manage onsite issues such as safety audits, progress updates, inventory checks and more.

04

IMPROVED SITE SAFETY

Mobile surveillance units help site managers improve worker safety in several key ways. Firstly, the ability to remotely view a site in real-time allows for identifying unsafe working practices or potential hazards before they lead to injury.

INVISIBLE PERIMETER

05

WCCTV's units can be utilized to create a virtual fence line around your sites that will issue an alert as soon as someone breaches the perimeter.

An alert will be issued to either the site manager or our [monitoring partners](#), who will initiate a complete theft prevention response to protect your assets.

06

TIME LAPSE VIDEO & PROGRESS UPDATES

Rather than physically visiting the site, they can access live streaming footage from a WCCTV unit. Even better, we can utilize WCCTV cameras to create a [time lapse video of the project](#).

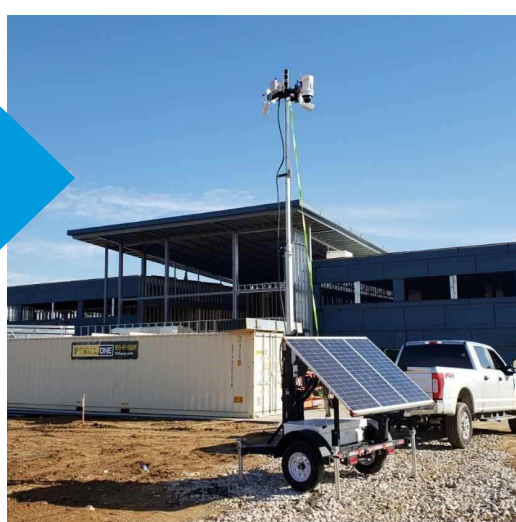

WCCTV will fit a high definition 4K camera to any of our security units and programme the system to record at preset intervals based on the length or nature of your project.

REPLACE OR ENHANCE GUARDING

07

Surveillance cameras offer [multiple benefits that a guarding service can't equal](#), including significant cost reduction, night vision, auto-detection, proactiveness, and continual alertness.

But some sites may not be able to or may not want to stop using guards completely. In these cases, a WCCTV mobile surveillance unit can work with a guard, enhancing their ability to respond to a situation.

08

PROTECT AGAINST LIABILITY CLAIMS

WCCTV's mobile surveillance units are constantly recording, keeping a visual documentary of everything that occurs on your site.

We have helped many clients resolve liability claims in cases of injuries that have occurred where the victim was trespassing or working outside of regulations.

Managed Surveillance Cameras for Construction Job Sites

Our market-leading security cameras are provided with a **managed service** that includes equipment installation, alarm monitoring, maintenance, and ongoing technical support.
