WCCTV Mini Dome Solar Trailer

The WCCTV Mini Dome Solar Trailer is an autonomously-powered surveillance trailer that can be rapidly deployed at practically any location, providing security for construction job sites, parking lots, public events or any off-grid location that requires video monitoring.

It takes just minutes to install the WCCTV Mini Dome Solar Trailer at your locations, and it can easily be moved as your applications change. It is an ideal surveillance solution for locations without any fixed infrastructure for power or video transmission.

The trailer is fitted with up to 4 of WCCTV's 4G Pole Cameras. All live and recorded footage is accessed via 4G LTE connectivity, so users can remotely access the cameras any time from any device.

The system contains inbuilt video analytics functionality providing verification and alerts, allowing for automated and intelligent surveillance. WCCTV's 4G Pole Cameras all feature additional input channels, allowing the integration of up to 3 extra fixed or PTZ cameras, all utilizing the feature-rich capabilities of the primary pole camera deployed on a solar trailer.

The trailer features a telescoping 20ft tower that rotates nearly 360 degrees and is equipped with highly reliable 260W, 390W or 520W autonomous solar power, which is suitable for most locations.

The system weighs less than 2100 lbs, making it towable by most vehicles.
