WCCTV Site Security

WCCTV is the USA's leading supplier of mobile surveillance cameras for construction job sites. Our state-of-the-art technology is backed by a managed service that includes equipment installation, alarm monitoring, maintenance, and ongoing technical support.

Our rapid-deployment security cameras provide construction sites with multi-application benefits, including Theft Prevention, Time Lapse Video Recording and Remote Project Management.

WCCTV delivers security solutions that are up to 87%* cheaper than utilizing security guards - without compromising quality, reliability, or results.

Solution 1: Pole and Power Available

If your job site has permanent powering facilities and a pole or building to mount security cameras, a WCCTV 4G IR Mini Dome is the ideal surveillance system.

The WCCTV 4G IR Mini Dome is quick and easy to install (20 minutes, 1 person), can be mounted to any existing utility pole or building, and quickly moved as your job sites develop and your surveillance needs change.

Features and Benefits

- Built-in 4G LTE for video transmission
- 1080p resolution PTZ camera
- Infrared (up to 650ft) night vision technology
- Up to 4TB of onboard video storage capacity
- Built-in video analytics
- Free, unlicensed viewing software (desktop and mobile app)
- Remote access to live and recorded video

* Figures based on the average salary of armed security guard against the average weekly cost of a WCCTV Solar Trailer

4G

Solution 2: Pole Available, No Power

If your job site has a pole for mounting a security camera but doesn't have power availability, then the WCCTV 4G Solar Mini Dome can deliver power autonomous for your video surveillance.

The solution comprises a WCCTV Pole Camera, solar panel, and a long-life battery built into a secure enclosure mounted to an existing pole.

Features and Benefits

- Solar pack for power autonomy
- Utilize existing physical infrastructure
- Renewable energy source
- Low voltage alerts

Solution 3: No Pole, No Power

For construction sites with the most limited powering and mounting infrastructure availability, WCCTV's Solar Trailer is a fully autonomous surveillance unit.

Solar Trailers can be rapidly deployed at practically any location and can easily be moved as your applications change.

Features and Benefits

- Provided with up to 4 WCCTV pole cameras
- Compact and easy to transport - towable by most vehicles
- 20-foot telescopic mast - rotates nearly 360 degrees
- Quick and easy to install
- Integrated 4G LTE connectivity
- Integrated blue lights, sirens and audio voice down for maximum visual deterrence
- Free and unlicensed viewing software
- Full power autonomy

WCCTV Managed Security Services

Each WCCTV mobile surveillance camera is backed by a comprehensive service designed to maximise effectiveness while minimizing the users' requirement to manage the units.

We aim to make using our surveillance cameras as easy as possible by providing a step-by-step process that reduces client workload and a service that ensures the cameras deliver the correct and desired right results.

WCCTV's Site Security Services Include:

- Consultation with our security experts
- Professional onsite installation service
- Alarm monitoring services
- Ongoing remote diagnostics
- Onsite maintenance and equipment relocation
- Performance reporting
- Video evidence packaging

Remote Alarm Monitoring Services

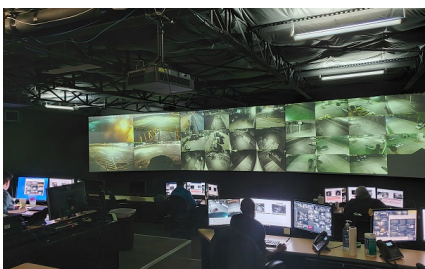

Security cameras are a powerful visual deterrent that assist with investigating criminal activity.

When coupled with a team of security professionals to monitor your sites, the units act as a virtual security guard.

As part of our WCCTV managed service, a world-class security team will be monitoring your sites - proactively protecting them from theft and criminal damage.

If an intruder is spotted on your site, our team will:

1. Issue audio warnings
2. Alert law enforcement
3. Inform you
4. Package video evidence

WCCTV Time Lapse Video

WCCTV is a specialty provide of Time Lapse Video Cameras for construction and demolition projects. Our Managed Service includes filming, monthly updates, and final production services.

Our team of installation engineers and video editing professionals will create a Time Lapse Video that brings your projects to life, in stunning high-definition up to 4K.

If you're looking for a proven method of generating publicity, engagement and new business, let Time Lapse Video tell the story.

WCCTV's 4K Time Lapse Video Cameras can be installed in multiple environments. We have the ability to install directly to a 110v power source, or it can be utilized on our solar trailers as well.

These cameras have the ability to function fully autonomously regardless of your power source on site, providing data and video over the cellular network.

Throughout your project, you will have access to WCCTV's time lapse portal, where you can review images and footage, download progress videos and even embed the live stream into your websites.

Features and Benefits

- High Definition Time Lapse Video Services
- Remote live access to video
- Managed Service Installation
- Full post-production and video editing to your specification
- Standalone service or as an add-on to your complete site security package
- Showcase your projects and celebrate the achievements of your teams

Case Study - Turner Construction

Turner Construction operates multiple job sites across the US across any given time. Some sites require extra security, time lapse video documentation and remote project management video capabilities.

Traditionally the above requirements have been supplied by three separate vendors, resulting in high resource utilization from both a cost and management perspective.

Turner elected to deploy the WCCTV Mini Dome Solar Trailer, an all-in-one mobile surveillance system that provides full perimeter security and can also be equipped with Time Lapse Video functionality.

The WCCTV Mini Dome Solar Trailer is a truly rapid-deployment CCTV system, meaning it can be installed and fully-operational in just a matter of minutes ensuring your sites are protected. This makes the Solar Trailer the ideal solution for temporary, mobile or semi-permanent applications.

By deploying the WCCTV Mini Dome Solar Trailer, Turner Construction was able to find a solution to a number of challenges. The solution offered an out of hour's site security system saving on costs against manned guarding and patrols.

Turner

"The WCCTV video tower provided the option of three autonomously feature-rich capabilities supplied in one device supplied and supported by one vendor reducing cost and lines of supply and communication, and was also able to provide time lapse video footage project as it developed to completion."
