WCCTV 4G IR MINI DOME + VOICE DOWN

WCCTV's combined Blue Light Alarm and rapid deployment pole camera system utilizes the additional input channel of any WCCTV Pole Camera to integrate a specialized voice-down horn speaker.

This unique all-in-one rapid-deployment mobile video surveillance system combines all the benefits of WCCTV's pole camera range with an easy to configure, customisable voice address system that is activated at the push of a button.

The horn speaker provides an effective crime deterrent in areas associated with graffiti, illegal dumping, violence, disorder, gang culture and drugs or at construction job sites, parking lots or oil fields.

It can also be utilized to provide temporary safety and security during major public events. The system's audio functionality can also raise an alert if a citizen is in distress.

The system harnesses the 4G LTE transmission, local recording (up to 4TB) and 360° PTZ field of vision of the WCCTV 4G Mini Dome to provide a complete situational overview.
