## The Growing Threats of Campus Crime: Key Trends to Watch Out For in 2026

# The Growing Threat of Campus Crime

Learn the latest campus crime trends, from rising incidents to emerging threats, and discover practical steps institutions can take to strengthen security and protect students and staff.

Campus crime is always evolving, universities and schools face a wider range of security threats every year as threats change and crime tactics develop.

From theft and vandalism to organized crime and personal safety risks, campuses must adapt to protect students, staff, and visitors, day-and-night.

To do this effectively, it's best that educational institutions understand the emerging crime trends and factors driving them so that proactive steps can be taken to strengthen security strategies and reduce risks before incidents occur.

# The 2026 Campus Crime Landscape: What's Changing

In the past, campus crime was considered as an isolated incident or predictable pattern of crime, but educational institutions can no longer treat it this way.

Recent years have shown a shift in crime both with the type and frequency of security threats, driven by a larger student population, open-campus access, and increased after hours activity.

This growth in activity and changes in environment provide unauthorized individuals and criminals with more opportunities for illegal activity, particularly in blind spots and areas of low visibility.

Social behavior has been a key driver in shaping campus risks nowadays, from a rise in organized theft and coordinated trespassing to a growth in shared incidents via social media.

Essentially, crime has become harder to anticipate and quicker to escalate, making the main challenge for campuses to prevent crime before it even takes place to ensure they aren't tackling a much more significant issue if allowed to escalate on-site.

# The 2026 Campus Crime Landscape: What's Changing

However, with tight budgets, limited resources, and stretched security teams, most educational institutions have been stuck making decisions that could be lessening campus security and interrupting crime prevention.

With many campuses only due to expand, the space to protect only grows and access becomes more difficult to manage meaning that traditional security measures no longer suffice institutions' requirements.

Therefore, understanding how and why campus crime is changing is crucial in developing effective prevention strategies and maintaining a safe learning environment for staff, students, and visitors. The clear impact of campus crime tends to only be visible when we look at how these incidents and crimes impact students, staff, and visitors.

# The Consequences of Campus Crime

Campus crime extends far beyond the immediate incident itself. When security challenges go unmanaged, the impact tends to have a rippling effect across student wellbeing, staff morale and trust, daily operations, and the educational institution’s public reputation.

These effects often stem from a combination of environmental factors, limited visibility, and delayed response, rather than a singular failure in your system.

We’ve outlined the consequences of campus crime, and where these originate from to help universities identify the common vulnerabilities they’re faced with and what needs to be prioritized based on this.

Consequence	How it Impacts Campuses	Where it Stems From
Student and staff safety concerns	Increased fear, lowered campus engagement, reduced attendance to events	Low-lit areas, lack of monitoring in high-risk areas, open-access layouts
Reputational Damage	Negative media coverage, lost trust from staff, students, parents, and stakeholders	Repeat incidents, slower response times, lack of transparency
Operational Disruption	Cancellations of class, restricted access to buildings, emergency closures	Unplanned incidents, inadequate incident detection, reactive security measures

# The Consequences of Campus Crime

Consequence	How it Impacts Campuses	Where it Stems From
Financial loss	Theft, vandalism, repairs, insurance claims, and legal action create additional costs	Limited deterrence, insufficient oversight, and a lack of asset protection
Staff burnout and morale issues	Increased pressure on security and facilities teams, higher turnover	Under-resourced teams, reliance on manual guard patrols, lack of real-time visibility
Compliance and liability risks	Regulatory scrutiny, investigations, legal consequences	Incomplete or inaccurate records, delayed and time-consuming reporting, inconsistent safety processes
Reduced student retention and recruitment	Prospective students choosing a safer alternative	Perception of unsafe campus environments driven by repeated incidents

Combined together, these consequences highlight why campus crime cannot be treated as singular incidents, making it essential for educational institutions to understand the key trends shaping security risks in 2026.

# Key Campus Crime Trends to Watch Out For in 2026

Balancing open access and growing security demands, campus crime patterns are continuing to develop and universities are faced with an uphill battle.

Whilst some risks remain familiar, no matter the year, others can appear at varying times, making them more complex, widespread, and harder to detect.

Understanding these trends helps institutions anticipate the vulnerabilities most likely to emerge in 2026 and where preventative efforts are best spent to manage these.

## Property Crime

### Hate Crimes

### Sexual Violence

### Burglary and Unlawful Entry

### Vehicle Crime and Theft

# Property Crime Remains the Most Common Campus Threat

Property crime continues to account for a large proportion of campus incidents, especially as institutions expand and more housing is introduced. From laptops and phones to bicycles and personal belongings, these items are easy-to-steal and often in high-volume amongst students.

And campus housing are not the only high-risk targets; libraries, communal spaces, and classrooms also carry such items, and tend to be quiet after hours, making them easier to target.

The high turnover of people on campus and constant movement provides opportunity for theft, vandalism, and other crime, particularly in areas with limited visibility, lowered monitoring, and at night.

As a new year emerges, and with high-value items only increasing in price, students are becoming common targets for personal property crime, meaning that so are campuses, hence the need for full campus security coverage.

# Burglary and Unlawful Entry Are Rising in Many Regions

On-campus housing, academic buildings, and storage facilities are hotspots for burglary and unauthorized access, becoming targets and leaving many students, staff, and visitors scared for their safety.

Evenings, weekends, and long holiday periods are often quiet on campus and provide criminals with predictable patterns to commit crime without being caught, especially if your institution lacks effective surveillance monitoring.

Other downfalls like inconsistent access control, outdated locks, and blind spots make it easier for intruders to enter undetected, hence the need to prioritize campus security in 2026 to minimize the routes available to thieves and intruders.

# Sexual Violence Remains High and Underreported

Sexual violence has seen a continued rise over the years for educational institutions, with over 6,000 reports of rape across campuses during 2023. However, the true danger is the number of these that go unreported and still do so.

Despite the increased awareness and reporting initiatives being carried out by campuses, it still remains a significant issue for them, with their large space and open access creating vulnerabilities in capturing crime before it can escalate further.

Victims still remain hesitant to come forward due to stigma, fear, or lack of confidence in reporting, meaning that to stop such crime, campuses will likely become more reliant on the advancement of technology to intervene.

Incidents tend to occur in low-visibility locations or during late hours, making prevention and investigation more challenging. Mobile surveillance has shown to be an effective support in this, providing both visible deterrence and proactive criminal prevention.

# Hate Crimes and Bias-Motivated Incidents Are Increasing

Many educational institutions are seeing increases in hate crimes and bias-motivated incidents linked to race, religion, gender identity, and sexual orientation. Since 2021, there's been a dramatic increase in hate crime, with reports **rising from 827 in the year 2021 to 2,676 in the year 2023.**

Their often quick escalation means these incidents not only impact the individuals involved by the wider campus community, causing student absenteeism, reduced engagement with events, and a lack of trust in the overall institution.

The openness of campuses and public events increase exposure to hate crime, particularly when tensions arise outside of the institution. With campuses only expanding, open space will only grow, as well as the number of attendees at events and this poses great vulnerabilities to students, staff, and visitors.

# Vehicle Crime and Theft Risk Persists to Staff and Students

Vehicle-related crime remains a persistent issue, especially in parking lots and peripheral campus areas. From vehicle theft and car component theft to vandalism and personal property theft from vehicles, these crimes continue to sweep across numerous educational institutions.

For staff and students, vehicle-related crime can have devastating impacts including, absenteeism, loss of work, financial loss, and a lack of trust. Other contributing factors can increase the likelihood of incidents, such as poor lighting, limited surveillance, and low foot traffic, leading to further ongoing risks to vehicles, as well as staff and students safety.

Parking lot security is often overlooked on campuses, but in 2026, this no longer can be the case. Ignoring the issue will only damage campus reputation, even leading to students dropping out based on safety issues and causing public media scrutiny. Campus crimes expand across various dangers, and managing all of these can be difficult, especially when working towards tight budgets. Campus leaders must make the right decision with security or face backlash and scrutiny from students, staff, parents, local communities, and the media.

# How Campus Leaders Can Prepare With Their Safety and Security

Preparing for campus safety challenges in 2026 requires a shift in your security from a reactive to proactive, intelligence-led preventative approach. Crime is constantly evolving, and campuses are expected to keep aware and ensure the correct tools are in place, with the main aim being to protect staff, students, visitors, and its reputation.

**Reactive**

**Proactive**

Campus' open, dynamic environments mean that leadership teams must rethink how visibility, criminal deterrence, and response is delivered across their sites. One of the biggest challenges they are faced with is that traditional systems like guards and fixed surveillance cameras struggle to adapt to modern-day issues, only leading campuses still at risk of developing threats.

From delayed reporting and fragmented oversight, traditional systems leave gaps in campus security and this is where mobile surveillance aims to bridge those gaps and provide complete protection.

# How We Help Campuses Address 2026 Security Challenges Effectively

With over 20-years of security expertise, we have worked with various campuses to reduce incident numbers and crime on-site.

The table below highlights how WCCTV surveillance solutions can help prevent emerging campus risks and how we differ from more conventional, traditional approaches.

Campus Crime Trend	Why Traditional Approaches Fall Short	How Our Surveillance Solutions Help
Property Crime	Passive recording and limited coverage allow theft to go undetected	High-visibility monitoring deters opportunistic theft and identifies incidents in real time, especially through our 20-ft Solar Surveillance Trailers
Burglary and Unlawful Entry	Fixed systems struggle to cover all access points and leave blind spots	Flexible deployment improves coverage around buildings, entrances, parking lots and vulnerable areas
Sexual Violence	Incidents occur in low-visibility zones with delayed discovery, often only established once reported	Increased visibility in key areas supports deterrence and faster response when concerns arise, aimed to prevent crime before it escalates

# How We Help Campuses Address 2026 Security Challenges Effectively

Campus Crime Trend	Why Traditional Approaches Fall Short	How Our Surveillance Solutions Help
Hate Crimes and Bias-Motivated Incidents	Limited monitoring during events or peak periods, and during the night	Scalable surveillance supports safer public spaces and improved incident documentation
Vehicle Crime	Car parks and perimeter areas lack consistent and appropriate oversight	Monitored coverage of parking areas helps deter theft, vandalism, and unauthorized activity

# A Checklist for Campus Staff and Students to Protect Themselves

Strengthening security measures is a central responsibility for educational institutions to implement, however, individual awareness also plays a large role in reducing risk on campus.

Below we've created a checklist that highlights simple steps that can be incorporated into the everyday routine of staff and students:

---

- ☐ Stay aware of your surroundings, especially at night and during quieter periods
- ☐ Stick to well-lit routes and avoid shortcuts through isolated areas, at night, and new spaces
- ☐ Keep valuables close and never leave items unattended in public spaces or vehicles
- ☐ Lock any doors, windows, bikes, and vehicles whenever you leave them, even for short periods of time
- ☐ Park in well-lit locations where possible and take any valuables with you when leaving your vehicle

**Continued**

# A Checklist for Campus Staff and Students to Protect Themselves

- ☐ Report suspicious behavior or incidents witnessed quickly, even if they seem minor
- ☐ Feedback any safety concerns to relevant campus personnel
- ☐ Where possible and safe to do so, remove yourself from any situations where you feel unsafe
- ☐ When leaving your property, ensure no items are left on display and lock your windows and doors
- ☐ Aim to plan routes in advance and use routes your familiar with if possible

---

By adopting these simple practices, staff and students can reduce their own exposure to risk and support wider campus safety efforts. Combine this with effective institutional security measures, this will create a safer learning and working environment for everyone.
